

Floor Speaker, Fully Active with room correction

Features

- **Fully-Active** Version
- **Wifi/Digital** Version (optional)
- Fullrange Driver
- Downfired Configuration
- Bassreflex
- Amp Module 180W
- RCA Input
- External PSU
- DSP
- Room Adaptation
- Bass-Management
- AUDIUM interactive Manual
- Genuine Wood Veneer

Technical Data

- Fullrange Ø: 100 mm (4")
- Woofer Ø: 220 mm (9")
- Amp Power Fullrange: 50 W
- Amp Power Woofer: 130W
- Power Supply: 200W
- Dimensions (WxHxD): 250 x 1020 x 340 mm
- Weight: 25 kg

Product Description

On the pulse of time - there you'll find AUDIUM products! Such is the **Comp 8 Active** - an active version of our full range speaker Comp 8. The active version makes a power amplifier obsolete. You can connect your audio source e.g. a network streamer or your PC directly to the loudspeaker.

This is made possible by a specially designed amplifier module. It powers the full-range driver and the 9" woofer mounted in the bottom plate of the loudspeaker through a 30W and 100W digital amplifier respectively. The integrated DSP performs the work of a classical crossover network and additionally allows an adaptation of the speaker to your listening room and your personal listening preferences.

In the current version 2 of the amplifier module we did not only optimise the sound, also the user interface has been completely re-implemented. A rotary encoder and a graphics display allow intuitive adjustment of all loudspeaker parameters. This makes installation and setup the speaker an easy game!

AUDIUM **Comp 8 Active** - on the pulse of time!
